Add to your orders and inquiries any desired sort not herein listed and we can usually supply the best stock obtainable in this market of nearly every variety in current demand in

New and Standard Roses

Sure thing—

an order placed early.

Disappointments were many for would-be-late buyers in the spring of 1909, numerous standard and popular sorts of roses having been completely sold out as early as March.

Get in on

the ground floor; send order or want list now for fall, winter or spring delivery. Choice of stock will be selected and set aside for early buyers.

Our rose crops are making splendid growth and will be largely sold months in advance of time for spring delivery.

Nature's way is our way

Propagating in spring and summer (the natural propagating seasons) from vigorous virgin wood, growing under sun heat in summer and early fall (the natural growing seasons), each plant standing on its own roots (nature intends no surgical operation for a *healthy* plant), we produce vigorous and fresh rose plants for fall delivery.

Resting through the winter (the natural resting season except for root making) in cool houses regulated for roses exclusively, we produce sturdy plants with well-ripened wood, in prime condition to withstand long travel and out-door planting in early spring.

Trouble—

by reason of lost vitality as in case of rose wood propagated from cut-flower plants forced to exhaustion in seasons contrary to nature—**none**:

by reason of “suckers” and “shoots” springing up from wild brier root stock and killing the budded or grafted plant—**none**.

We have the location, the soil, the facilities, the experience.

We add care, competence, vigilance, method, truth, candor, courtesy, alacrity.
